

OHIO UNDERGROUND DAMAGE PREVENTION COALITION

EXEMPTIONS SUBCOMMITTEE

4/30/2019 COMMITTEE UPDATE

Topic: Review of exemptions within the State of Ohio as well as the Government Entity exemption that is in the definition of exaction in the Ohio Revised Code.

Issues Covered: A lot of information was put together of the exemptions permitted from all states and sent to all committee members for review. Members within the committee, at this point in time, have agreed to concentrate on the question of only a governmental entity having an exemption for excavation of anything less than twelve inches (12”).

Next Steps: The committee will obtain information from the Ohio Municipal League, American Municipal Power, and the Ohio Chapter of the American Public Works Association to determine their thoughts/position on this exemption.

If there are suggested “activities” from any of our Committee members, that they feel would fall within the excavation of less than twelve inches (12”) that could be an exemption, please provide either Alice or Darren with those activities.

Respectfully Submitted

Darren Owens
